🌐 <https://ajay-rathod-portfolio-341e.vercel.app/>

TECHNICAL SKILLS

Frontend

- HTML5, CSS3, JavaScript, React.js, Bootstrap, Tailwind CSS, Redux

Backend

- Node.js, Express.js, Python, FastAPI, Django, REST APIs

Databases

- MongoDB, Mongoose, SQL, SQLite

AI & Generative AI

- Generative AI, LLM Integration, OpenAI API, Prompt Engineering, NLP

Authentication & Application Development

- JWT Authentication, API Integration, Real-Time Communication, Responsive Web Applications

Tools

- Git, GitHub, VS Code, Postman, Vite

CERTIFICATIONS

- Full Stack Development Course**
GUVI | HCL
- Generative AI Course: Build AI Apps with LLMs & Generative Models**
GUVI | HCL
- Hands-On with OpenAI API Using React.js**
GUVI | HCL

ADDITIONAL CERTIFICATIONS

- AI-Powered Portfolio Advisor Using JavaScript**
GUVI | HCL
- AI-Powered Text Assistant Using React.js**
GUVI | HCL
- ChatGPT for Everyone: Complete Generative AI & Prompt Engineering Course**
GUVI | HCL
- JavaScript**
GUVI | HCL

EDUCATION

Ghousia College of Engineering

Bachelor of Engineering (B.E.) — Computer Science & Engineering

Affiliated to Visvesvaraya Technological University (VTU)

Bengaluru, Karnataka, India

Currently Pursuing

PROFESSIONAL SKILLS

- Problem Solving
- Communication
- Teamwork
- Adaptability
- Continuous Learning

PROFESSIONAL SUMMARY

Full-Stack Developer focused on building modern web applications and practical AI-powered software solutions. Experienced in developing end-to-end applications using React.js, Node.js, Express.js, Python, FastAPI, MongoDB, Django, and REST APIs. Skilled in implementing authentication, database integration, responsive user interfaces, API integration, and real-time application features. Also experienced in integrating Generative AI and LLM-based capabilities using APIs such as OpenAI. Strong focus on building real-world projects, solving development challenges, and maintaining clean and understandable application architecture.

PROJECT EXPERIENCE

AI CareerPilot — AI-Powered Career Development Platform

Technologies: React.js, Vite, Tailwind CSS, Python, FastAPI, MongoDB, Pydantic, JWT, NLP, Scikit-learn, OCR

🐙 **GitHub:** <https://github.com/ajayrathodddd/AI-CareerPilot>

🌐 **Live Demo:** <https://ai-careerpilot-ochre.vercel.app>

- Designed and developed a full-stack AI-powered career development platform connecting a React/Vite frontend with a FastAPI backend and MongoDB database.
- Implemented an AI Resume Analyzer to process resume information and identify relevant skills.
- Developed Job Matcher functionality to compare resume skills with job-description requirements.
- Implemented skill-gap analysis to identify missing or required skills from job descriptions.
- Developed a Learning Roadmap feature to help users organize learning requirements.
- Added authentication functionality using JWT and backend validation with Pydantic.
- Integrated NLP and Scikit-learn-based processing for skill extraction and analysis workflows.
- Added OCR capabilities for extracting information from uploaded documents.
- Structured the application into frontend, backend, database, AI/NLP, and OCR components for maintainability and future expansion.
- Built the application as a production-style portfolio project with deployment-ready architecture.

Rathod E-Commerce Platform

Technologies: React.js, Django, Redux, REST APIs, SQLite

🐙 **GitHub:** <https://github.com/ajayrathodddd/rathod-e-commerce-platform>

🌐 **Live Demo:** <https://rathod-e-commerce-frontend.onrender.com>

- Developed a full-stack e-commerce application using React.js for the frontend and Django for backend development.
- Implemented product browsing, product details, shopping cart, checkout, and order-management workflows.
- Implemented frontend state management using Redux and Redux Thunk.
- Integrated the React frontend with backend REST APIs using Axios.
- Developed Django models, serializers, views, URL routing, and database migrations.
- Implemented user authentication and protected application workflows.
- Resolved frontend dependency and case-sensitivity issues during deployment.
- Configured the application for separate frontend and backend deployment using Render.
- Improved production deployment configuration and API/media handling for the deployed application.

Social Media Application

Technologies: React.js, Node.js, Express.js, MongoDB, Socket.IO, JWT, Multer

🐙 **GitHub:** <https://github.com/ajayrathodddd/Social-Media-App>

🌐 **Live Demo:** <https://social-media-app-frontend-tuie.onrender.com>

- Developed a full-stack social media application with React.js frontend and Node.js/Express.js backend.
- Implemented user authentication and protected API workflows using JWT.
- Developed social-post functionality including post creation, image upload, comments, likes, saves, and post deletion.
- Integrated MongoDB using Mongoose for persistent application data.
- Implemented user search and profile-related functionality.
- Developed chat functionality using REST APIs and Socket.IO for real-time communication.
- Configured image upload and backend media serving using Multer and Express static-file handling.
- Deployed the backend and frontend separately on Render and configured production environment variables.
- Resolved production deployment issues involving Git repository structure, frontend routing, API endpoints, and case-sensitive imports.

PROJECT HIGHLIGHTS

- Developed multiple full-stack applications covering e-commerce, social networking, and AI-powered career development.
- Worked with both MERN-style technologies and Python-based backend technologies.
- Implemented REST API integration, authentication, database connectivity, file uploads, and real-time communication.
- Deployed projects using cloud hosting platforms and resolved real deployment and production configuration issues.
- Built AI-focused applications involving Generative AI, LLM integration, NLP, skill analysis, and OCR.
