PROFESSIONAL SUMMARY

Full-Stack Developer focused on building scalable web applications using React.js, Node.js, Express.js, and MongoDB. Experienced in developing end-to-end applications with REST APIs, database integration, authentication, and responsive user interfaces. Skilled in integrating Generative AI and LLM-based capabilities using APIs such as OpenAI to build practical AI-powered applications. Strong focus on clean development practices, problem solving, and building real-world software projects.

PROJECTS

1. AI CAREERPILOT

React.js | Node.js | Express.js | MongoDB | Generative AI

- Developed an AI-powered career development platform focused on helping users with career preparation and guidance.
- Built full-stack functionality using React.js, Node.js, Express.js, and MongoDB.
- Implemented career-focused capabilities including resume analysis, job matching, skill-gap analysis, learning roadmaps, and interview preparation.
- Integrated AI/LLM capabilities to provide personalized career-oriented assistance.
- Designed the application as a practical AI-powered full-stack project for real-world career development use cases.

2. RATHOD E-COMMERCE PLATFORM

React.js | Django | Redux | REST APIs | SQLite

- Developed a full-stack e-commerce web application using React.js for the frontend and Django for the backend.
- Built product browsing, shopping cart, checkout, and order-management workflows.
- Implemented frontend state management using Redux and Redux Thunk.
- Integrated the React frontend with backend APIs using Axios.
- Developed backend components using Django models, serializers, views, URL routing, and database migrations.

3. SOCIAL MEDIA APP

React.js | Node.js | Express.js | MongoDB

- Developed a full-stack social media application using React.js, Node.js, Express.js, and MongoDB.
- Built frontend and backend components for a social networking application.
- Implemented REST API-based communication between the client and server.
- Integrated MongoDB for application data storage using the backend.
- Structured the application using separate frontend, backend, API, and database components.
